Profile

Linux & DevOps Engineer with 5+ years of experience managing production Linux infrastructures, Kubernetes/OpenShift platforms, CI/CD pipelines, and infrastructure automation. Experienced in deploying and supporting scalable enterprise applications across production and pre-production environments using Jenkins, ArgoCD, Helm, Ansible, and Azure DevOps. Strong background in system reliability, GitOps workflows, monitoring, observability and troubleshooting complex infrastructure environments.

WORK EXPERIENCE

DevOps Engineer, Unitask Group • Deploy and orchestrate containerized enterprise applications using Docker, Kubernetes, and OpenShift in production environments. • Design, automate, and maintain CI/CD pipelines using Jenkins, Ansible, Azure DevOps, and ArgoCD. • Implement GitOps workflows and Helm based deployments to improve deployment consistency and operational efficiency. • Manage VMware infrastructure environments, including VM provisioning, lifecycle management, and infrastructure availability across multiple sites. • Monitor infrastructure and application health using Prometheus, Grafana, and Splunk to support observability, troubleshooting, and system reliability. • Perform infrastructure troubleshooting and operational support across Linux and Windows based applications.	09/2023 – Present
Linux Engineer, Unitask Group • Managed and maintained hosts and servers across production, staging, and pre-production enterprise environments. • Supported infrastructure availability, scalability, and operational reliability across multiple systems and environments. • Administered enterprise storage solutions including NetApp and VMware vSAN, improving infrastructure stability and resource utilization. • Designed and implemented Ansible playbooks and Jenkins automation workflows for server provisioning, configuration management, and application deployments. • Managed Active Directory objects and DNS configurations, and enforced Group Policy (GPO) settings to improve infrastructure security and operational management.	09/2020 – 08/2023
System Administrator, Prime Minister Office • Managed and maintained Linux and Windows server infrastructures across multiple enterprise environments. • Performed backup and disaster recovery operations using VEEAM to ensure infrastructure resilience and data availability. • Monitored infrastructure and system health using SCOM including alerting, dashboards, and performance monitoring. • Managed and configured Cisco and Juniper network devices to support reliable network connectivity and infrastructure operations.	08/2019 – 09/2020

EDUCATION & COURSES

B.Sc. in Computer Science, HIT Institute of Technology
Practical Engineer, ORT College
CCNA Routing and Switching, Cisco

TECHNICAL SKILLS

Linux & Infrastructure RHEL, VMware, NetApp, Active Directory, DNS, DHCP, Certificates, PowerShell, Bash	Containers & Orchestration Kubernetes, OpenShift, Docker, Helm
CI/CD & GitOps Jenkins, Ansible, ArgoCD, Azure DevOps, Git	Monitoring & Observability Prometheus, Grafana, Splunk, SCOM

LANGUAGES

Hebrew Native or Bilingual Proficiency	English Full Professional Proficiency
